

## MEDIA FRAME VINYL SPECIFICATIONS

**Material:** 7oz to 22oz

*(Recommendations: 13oz for Buildings/Wallscapes & 18oz for Truckside)*

**Sizing:** Vinyl Size should be EQUAL to Frame Size.

**Finishing:** Be sure vinyl media has **RAW EDGE**. No Hems, Grommets, or Beading of any kind. Vinyl media should be **ROLLED on a tube**, rather than folded and boxed, whenever possible.

## ACCEPTABLE FILES

**JPEG, PDF, TIFF**

All layers must be flattened.

**Maximum File Size: 150MB**

CMYK Files are preferred.

*All RGB files will be converted to CMYK, which will result in color shifts and may lead to undesirable results.*

**Recommended Min. DPI: 100**

(@ 100% of Actual Finished Size) Min. DPI @ ½ Scale: 200

Please build files to the bleed, keeping all important visual elements inside the safe zone.

## EXAMPLE:

**Frame Size (Outer Dim): 180"W x 96"H**

**Vinyl Size/Trim Size: 180"W x 96"H**

**Bleed Size: 180"W x 96"H**

**Viewable Opening (V/O): 174"W x 90"H**

**Safe Zone/Live Area: 168"W x 84"H**
